**DETAILED ACTION**

***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 16 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 16 directs to information *and* a medium. Since the information do not provide any functional interrelationship to the medium for controlling the medium to reading and access the information from the medium, or impart to any software and hardware structural components to perform a function that is processed by a computer, the information themselves can not make them statutory. See MPEP 2100. The recitation "the video data recording device ... picture video file" at the last two lines is an intended use since there is no recitation in the claim to specify how the video management information file is read out and is interact with any means or circuit of the recording device or reproducing device to reproduce the still picture file. Further it is noted that claim 16 directs to information on a medium, not to an apparatus.

It is suggested that "An information recording medium -- reproducing apparatus" lines 1-2, needed to be changed to -- A data recording /reproducing apparatus comprises an information recording medium -- to overcome the 101 rejection.

***Claim Rejections - 35 USC § 112***

Art Unit: 2621

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 17-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

Claim 17 is indefinite as being a hybrid claim. Claim recites a medium recorded with information and method for recording the information however, claim do not provide any and connection and support between a medium and method since the claim do not provide any steps of generating or forming the audio/video data, still picture audio/video file information table, program chain information from the medium.

Claim 18, last line, after "data area" should be inserted - based on the reproduced control information.

***Allowable Subject Matter***

5. Claims 17-18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.
